NIKI |

PLAYFUL YET ELEGANT, NIKI'S CLEAN CIRCULAR GEOMETRY IS EQUALLY CAPTIVATING AND WELCOMING.

It's nautical inspiration stems from the use of porthole windows in Streamline Modern and Art Deco architecture. The Niki is also available with an ornate step-down perimeter. When paired with a satin finish, this decorative element and Niki's starburst reflection of light is whole-heartedly indicative of Art Deco inspired design.

Material: Solid Brass

A. Niki Cabinet Knob 2820
Available sizes ø : 50-70mm

B. Niki Entrance Handle Entrance G2020
Available sizes ø : 100-150-200-250-300mm

KAMEN

WITH MASCULINE YET SOPHISTICATED PROPORTIONS, THE KAMEN FAMILY DEMONSTRATES THAT VERSATILE ELEGANCE DOESN'T ALWAYS NEED TO BE SOFT.

Inspired by the increasing popularity of high-end residential warehouse conversions, the Kamen family fuses an industrial aesthetic with the perception of delicate craftsmanship. With knurled detailing and refined proportions, the family strays from the overbearing presence many of it's competitors exhibit. Instead, it opts for a projection that has a lower profile, a slimmer handle and even slimmer stems.

CLUB

SMOOTH SIMPLICITY WITH OLD-WORLD HOMAGE.

The Club's aesthetic is a relaxed take on modern silhouettes. Its adaptable, allowing it to be used on contemporary brutalist projects when it's dressed in a black finish while equally able of complimenting various 20th century inspired interiors when adorned in a brass or nickel finish. In non-satin finishes the Club can also be complimented by the Niki family.

Material: Solid Brass

A. Club Entrance Handle G3608
Projection : 55mm Width : 25mm or 40mm
Available sizes | 300 | 400 | 600 | 800mm

D. Club Door Lever CL-R10
Projection | 46mm
Length | 136mm

MONTANA

MONTANA'S SOFT TRANSITIONS AND SHARP ELEVATIONS CULMINATE IN ALIGHT, MINIMAL, AND THOUGHFULLY HUMBLE DESIGN.

Minimalism, mid-century modern interiors, and scandinavian designed furniture became increasingly popular in the mid-20th century, and now have widespread influence over contemporary interiors. The almost clinical ideal of simplicity portrayed in interiors today has lead many designers to integrate handles into joinery and furniture. This focus on the bare minimum, the removal of clutter and complexity from our daily lives, was what inspired the Montana range.

FLINDERS

THE FLINDERS RANGE IS SIMPLE, MODERN AND MINIMAL.

Steel tubing was first explored in furniture design in the mid 1920s at the Bauhaus by Marcel Breuer whom was inspired by the slimness of his bicycle's light weighted frame. The use of cylindrical and tube shapes with metal finishes adds to contemporary interiors a such refined softness. The Flinders range is a simple, modern and minimal product offering that compliments the tubular design language from the mid 1920's.

BULLET STONE +

PARING RAW CONCRETE WITH SUMPTUOUS METAL FINISHES TO CREATE A STRIKING COLLECTION OF DOOR HARDWARE THAT MAKES AN ELEGANT, HAND-CRAFTED DESIGN STATEMENT.

Concrete exhibits variations of shade, colour and natural imperfections, in both architecture and interior design, the use of rough and exposed concrete is widely used. Combined with luxurious metal, Bullet+Stone hardware promotes a visible and tactile contrast that allows you to explore new realms of design.

MONTE

INTRODUCING THE NEW MONTE TIMBER COLLECTION.

We've brought the organic characteristics inside the home, giving people the experience of embracing and connecting with nature at every touch. With the use of American white oak and black walnut either oiled or natural, these timber species will enhance the natural beauty of most interiors.

CONCRETE FINISHES

The Bullet+Stone Collection uses artisanal, hand-crafted concrete components, and a variety of metal finishes, to highlight the beautiful contrast between raw and sumptuous contemporary materials.

Concrete is not a homogeneous, uniform material & just like natural wood or stone, the finished concrete's appearance will always have aesthetic variations of shade, color, pattern and overall size

Luna Grey (LGR)

TIMBER FINISHES

We offer our hardwood levers, entrance, cabinet handles and blade pulls in a choice of two hardwood species - American White Oak and American Black Walnut. These two species can be purchased in either a raw or scandinavian oiled finish, shown below.

Our timber is supplied from environmentally-friendly AFS and PEFC certified sources. Other timber species such as Blackbutt and Spotted Gum are available on request.

American White
Oak - Raw
(OAK-RAW)

American White
Oak - Oiled
(OAK-OIL)

American Black
Walnut - Raw
(NUT-RAW)

American Black
Walnut - Oiled
(NUT-OIL)

LIVING FINISHES

SBU, PBU, ABM, ABD, FBM, FBD, ORB, WBL, WBM

Designer Doorware's living finishes are fabricated and coloured by hand; variations in size, shape, and colour are a natural result of this process. Tooling marks and surface scratches are part of the character of the finished pieces. Most products are sealed with wax, which over time is not impervious to moisture and corrosion or wear and tear. The standard wax coating allows the finish to age naturally and develop its own character and morph into the environment wearing off where it is used most exposing the natural material underneath, this will patina with time and become a living finish. Due to the artisan, hand-made nature of these finishes, every product is unique. While we aim for consistency, there will always be a degree of variance with living finishes. Do not use methylated spirits on any products with a living finish, as it may strip away any aesthetic or protective coating.

PLATED, PVD & POWDER COATED FINISHES

SC, PC, SN, PN, SBC, BC, VBS, PCC, BKA, VBK

Do not use harsh solvents, abrasives cleaners or scourers on any Designer Doorware products as this may affect the thickness of protective coatings such as plating and powder-coating. Also note that powder-coated finishes may chip with rough handling, and therefore caution should be taken during maintenance and use.

FINISHING CARE & MAINTENANCE

For details regarding Finish Care & Maintenance please refer to installation documentation or visit the website.
